I may be the only girl in my high school going through menopause, but I'm not dumb enough to drink horse urine! Premarin, the most widely prescribed menopause drug, is actually made from pregnant mares' urine. Its production causes misery and death for tens of thousands of horses and their foals every year. That's why it's the **ONE** drug you'll never find in my locker.

Check out the alternatives by visiting [www.MenopauseOnline.com](http://www.MenopauseOnline.com).

# URINE

What a surprise!

Amy Sedaris as Jerri Blank of Comedy Central's *Strangers With Candy*.
